

ENVIRONMENTAL SCHOOL

Course I - The Living Earth
April 24 and 25, 2018
River Forest, IL

SAVE THE DATE

All gardeners will find something of interest as we explore the importance of plant biodiversity and learn how to create a backyard wildlife habitat. Our field trip will take us to the Trailside Museum of Natural History in River Forest where we will take a nature hike through the surrounding Forest Preserve to view the colorful wildflowers in this beautiful oak woodlands and floodplain forest.
